Spring "Screening"

Help CPP serve you better by screening information that's no longer relevant and updating your company's contact information. Click the link "Update Information" in the body of this email to download a copy, complete and return to CPP via mail or email.

***** EXTRA! EXTRA! *****

CPP Announces It's Incident Reporting Incentive Program

Report your incident to CPP within 72 business hours along with the police report and number, and the person reporting will receive a gift from CPP. It's that simple.

Have an incident? Here's how you can file a report with CPP:

Option 1: File a report directly from our mobile-friendly website:

<https://cppsocal.org/members/incident-report/>

Option 2: Download an incident report from our website, complete and email to

Melissa.somers.cpp@gmail.com

Option 3: Call CPP and ask to have an incident report form emailed to you

Option 4: Call CPP to report your incident @ 562-860-9006.

***** BONUS *****

Report your theft within 24 hours and with the information provided in the link and you will be placed in a drawing for out GRAND PRIZE!

Incentive program runs March 5, 2018 through May 31, 2018. Grand Prize winner will be announced June 1, 2018.

Theft Trends

and What You Can Do to Protect Your Assets

Incidents involving small pieces of equipment and hand tools are on the rise. In fact, a substantial number of incidents that have been reported to CPP so far in the first quarter of 2018 have involved items that are often neglected when a company starts marking their equipment with their OAN or other company identifiers. The number of selling platforms (Craigslist, OfferUP, Letgo), while a great way to find a gently used fishing pole for your kin, make selling things extremely easy for those with less than good intentions. Things like generators, compressors, hand tools, tail gates – anything that is portable that can be easily sold - is fair game.

CPP has proven methods on how to help protect your inventory, and contacts in security and aftermarket resources for our members. Let us help you secure your inventory, vehicles and equipment –no matter it's size.

Large or Small, Mark It All!

Now, more than ever, it's vital to consider taking the time to mark your small tools and equipment. These items, understandably, take a back seat to larger, more expensive items in your inventory, but their value becomes evident when they go missing and take your team out of play. There are marking options to fit any budget and time constraints, from adding CPP Reward Hotline decals, inventory numbers and your OAN, to laying out all the tools in your truck and spray painting a stripe on the whole lot. While CPP encourages the marking of equipment with CPP recommended markings, we also know that when push comes to shove and time is short, that marking your equipment with *anything* that can identify it as yours, is better than nothing. Keep in mind: If you do have a loss involving small tools, and they are located, you might not be able to get them back if you can't prove they are yours.

Upcoming Events, Information and Happenings

Please join us for CPP's 2nd Annual

Member Social

Thursday, June 7th at Backstreet Brewery in Anaheim.

Call Karen Meely @ 323-972-0922 to order your tickets today.

(Event flyer and Sponsorship information provided in email link.)

CPP Board of Directors Meetings:

April 24th, May 29th and June 26th

SITECH Pacific LLC is Southern and Central California's authorized Trimble dealer. Located in Riverside since 2011, SITECH sells, rents and services Trimble Technology for the construction industry. SITECH experts deliver and train on machine control technology, helping you get the most production out of your machines. SITECH training includes Trimble's Business Center software for planning and estimating and VisionLink for a connected worksite. Sitech is your local expert for Trimble Connected Site solutions and can help your company solve some of the biggest challenges you face on the construction site. With over 2M dollars in machine, parts and rental inventory, we are able to supply your project with equipment and expertise.

Give SITECH a call today to find out how Trimble Construction Technology can benefit your company. 951-300-0400 // Sitechpacific.com
